

GreenClean

LIQUID BACTERIA

Keeps Water Clear and Odor-Free

Formulated to reduce ammonia, nitrites and excess nutrients that can cause odor.

GreenClean Liquid Bacteria is a concentrated microbial, scientifically blended and tested for reducing ammonia, nitrites and excess nutrients that can cause odor and affect water quality and clarity.

DIRECTIONS FOR USE

1. Apply 3-5 gallons per surface acre of water.
2. Spray GreenClean Liquid Bacteria at 1 part product to at least 10 parts water. Use the higher rate when water clarity is most needed.
3. Afterwards, apply 2 gallons of GreenClean Liquid Bacteria per surface acre every six months.

FOR BEST RESULTS:

Apply GreenClean Granular Algaecide or GreenClean Liquid Algaecide to existing algae, at recommended rates, prior to using GreenClean Liquid Bacteria. Wait 48 hours before applying GreenClean Liquid Bacteria.
